

Contoh²:

* Matematika:

* Percabangan & Pertemuan Isyarat

$$E = X - 0,1(Y - 4X) = X - 0,1Y + 0,4X = 1,4X - 0,1Y$$

$$6E = 6(1,4X - 0,1Y) = Y - 4X$$

$$8,4X - 0,6Y = Y - 4X$$

$$1,6Y = 12,4X \rightarrow Y = \frac{12,4}{1,6}X = 7,75X$$

$$\boxed{K = 7,75}$$
