Hari ini

Dari Hiroshima-Nagasaki

ke WTC 911,

sampai Bom di Bali!

..... dan Makassar!

..... Agresi AS dan sekutunya ke IRAQ !

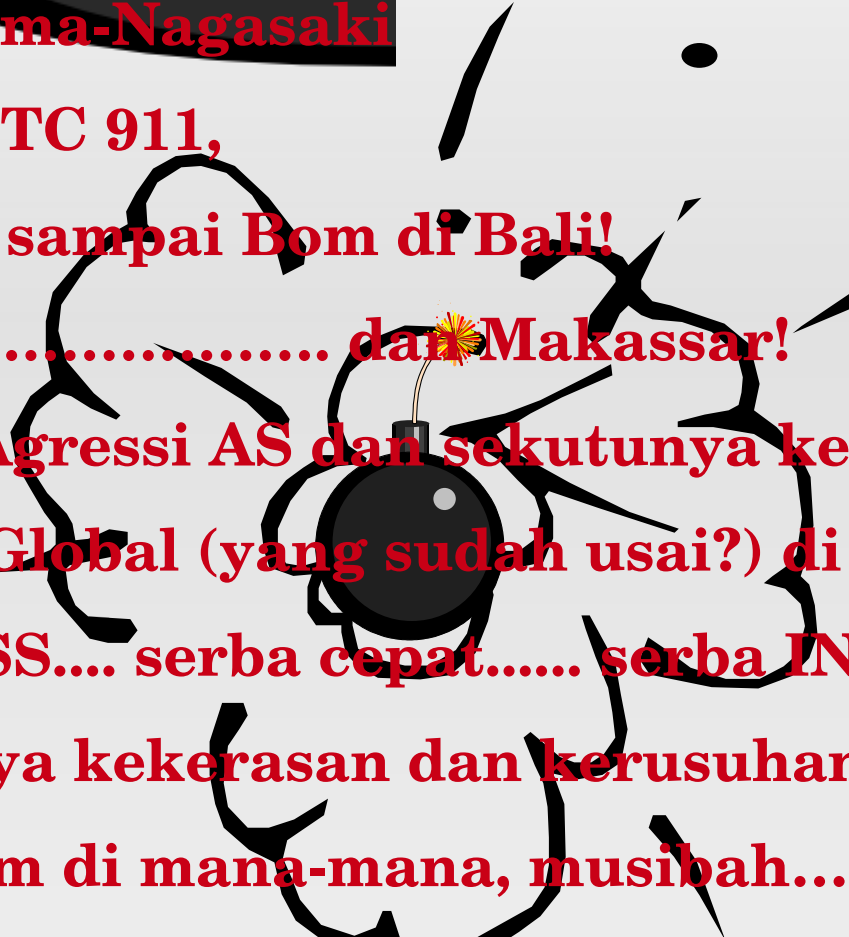

Persaingan Global (yang sudah usai?) di era pasar bebas

serba STRESS.... serba cepat..... serba INSTANT

Meningkatnya kekerasan dan kerusakan

Bencana alam di mana-mana, musibah.....

..... Global warming !!!.....

Masa depan bumi ?

BUMI
2070

Terror Attack

Hijacked Jets Fly Into Trade Center, Pentagon

Summary of Events

At 8:46 a.m., a Boeing 767-300ER hijacked by two men flying from Newark, N.J., to Los Angeles crashed into the North Tower of the World Trade Center, 110 stories above the ground. The plane, which was carrying 260 people, disintegrated on impact, and a massive plume of smoke and debris rose into the air. The tower, which was the tallest building in the world at the time, began to shake and sway. Within minutes, the tower was engulfed in flames and smoke. The attack caused the tower to collapse at 10:28 a.m., less than three hours after the impact.

A Day of Carnage and Chaos

The attack on the World Trade Center was the first of a series of coordinated attacks on the United States. Within hours, a second hijacked plane crashed into the South Tower of the World Trade Center, and a third hijacked plane crashed into the Pentagon. A fourth hijacked plane, which was flying from Washington, D.C., to Los Angeles, crashed in a field in Pennsylvania. The attacks caused the death of nearly 3,000 people and the destruction of property worth billions of dollars. The attacks also led to the start of the War on Terror, a global conflict that has lasted for more than two decades.

WTC The towers of the World Trade Center, which were the tallest buildings in the world, were hit by two hijacked planes. The towers collapsed, and a massive plume of smoke and debris rose into the air. The attack caused the death of nearly 3,000 people and the destruction of property worth billions of dollars. The attacks also led to the start of the War on Terror, a global conflict that has lasted for more than two decades.

UNITE The attacks on the World Trade Center and the Pentagon were part of a coordinated effort by al-Qaeda to strike the United States. The attacks caused the death of nearly 3,000 people and the destruction of property worth billions of dollars. The attacks also led to the start of the War on Terror, a global conflict that has lasted for more than two decades.

Survivors The attacks on the World Trade Center and the Pentagon were part of a coordinated effort by al-Qaeda to strike the United States. The attacks caused the death of nearly 3,000 people and the destruction of property worth billions of dollars. The attacks also led to the start of the War on Terror, a global conflict that has lasted for more than two decades.

WHY THE TOWERS COLLAPSED

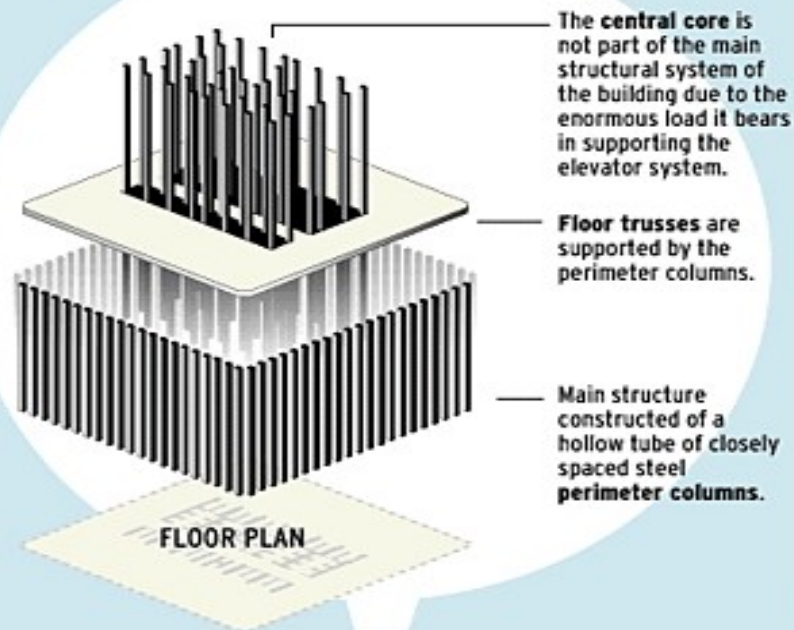

The impact of the plane crash destroyed a significant number of perimeter columns on several floors of the building, severely weakening the entire system.

As fire raged in the upper floors, the heat gradually affected the remaining structure.

The prolonged high temperatures, fuelled by the large volumes of aviation gas, weakened the steel core struts.

When the fire reached 1,500°F, the weakened struts collapsed and the truss system collapsed vertically.

The building's perimeter columns and floor trusses form a steel lattice, which was designed to act as a wind brace, thereby keeping disturbance away from the central core.

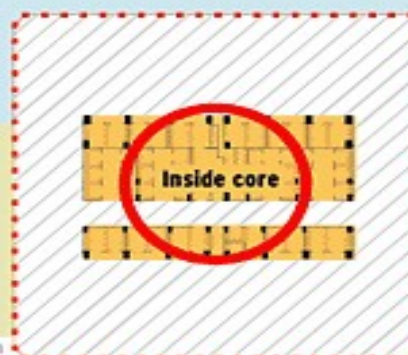

The central core is not part of the main structural system of the building due to the enormous load it bears in supporting the elevator system.

Floor trusses are supported by the perimeter columns.

Main structure constructed of a hollow tube of closely spaced perimeter columns.

FLOOR PLAN OF THE WORLD TRADE CENTRE

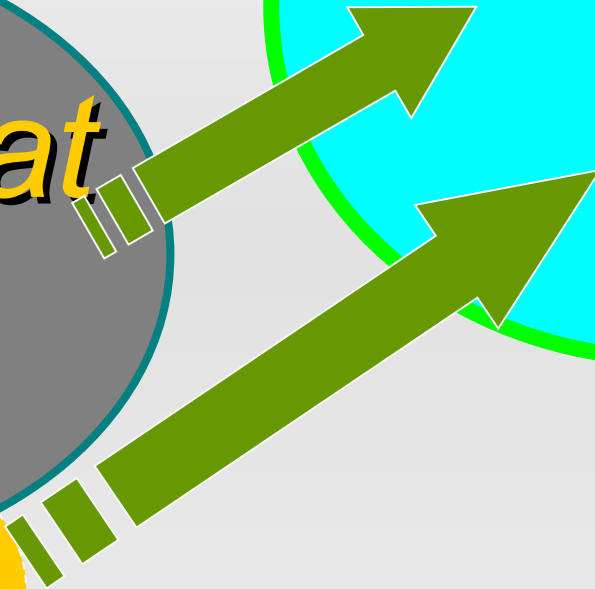

A hollow tube of closely spaced perimeter columns form the main structural component of the tower.
