## Reasons for Recommendation

**Ms. Muhaimin Hading** was one of my best students. She took all of my classes in the field of Engineering Mathematics, Numerical Methods, Modeling and Simulation. She was clearly one of my straight A students. Her cumulative GPA when she was graduated was 3.66 out of 4.00 which she really deserved. Ms. Hading has recently sent me her academic transcript and curriculum vitae, showing me her excellent and extra-ordinary achievement as an undergraduate student, both academically and socially.

She had been involved in many extracurricular activities, especially those related to the field of study she is majoring at our department. She was awarded a scholarship to participate in the Japanese Short-term In Session Program (J-ShIP) for an Autumn Course in Osaka University, Japan, from October to December 2012. In addition to that, almost all the time during her tenure as a student in our department, she was always supported by scholarships awarded by various institutions, national as well as international.

I am very proud of this young lady, and I am very happy to hear that she has applied for a scholarship to continue her study in Japan. I have been so thoroughly impressed by Ms. Hading's academic competence in her field, and that she showed a great interest to experience living in another country, I strongly believe that she will complete her graduate study program without any difficulty what so ever.

Should you wish to get any further information, please feel free to contact me, and I will be happy to respond to your inquiries
