## LETTER OF RECOMMENDATION

To Whom It May Concern:

**Mr. Furqan Idris, S.T.** has asked that I prepare this official Letter of Recommendation to support his intention to continue his study to pursue a Masters degree in engineering by participating in your scholarship program. I do so with great enthusiasm.

I have been in acquaintance with Mr. Idris since 2002 when he was admitted to the Department of Electrical Engineering, Hasanuddin University, Makassar INDONESIA - where I myself have been with since 1983 and chaired the department in 2003. Mr. Idris was one of the Department's best students. I knew him very well since we had worked together a couple of years ago to prepare our university's team to participate in a national contest of ROBOTICS in Surabaya, another city across the sea from our place. The team and all their equipments and logistics should travel overnight in a ship. Thanks to the applicant's strong management skills and his special way to encourage his team mates, the team succeeded to participate in the contest, despite all difficulties the team had to face along the way. We are among the founders of a group of students and faculty members who shared interest in ROBOTICS. We named the group the "*Komunitas Cyber-Tech*" or the Cyber-Tech Community. I witnessed how he dedicated much of his time and efforts to the group activities to clearly show and prove his very strong commitment to his community.

Mr. Idris graduated with a cumulative GPA of **3.07** out of **4.00**. He has recently sent me his curriculum vitae, showing me his excellent career as a system operation engineer in the only state-owned electrical power company in the country. He has been stationed for a system operation planning job at a branch far away from her home and family. For not quite long, he was soon promoted to a higher position in the company's head quarter in the capital city, indicating how well his career has been. It was not surprising to me, since I used to admire his ability to work hard, his strong motivation to learn and his competence in his field. I observed that he has no difficulty what so ever to work together with his colleagues from various background and nationalities. I am very proud of this young man, and I am very happy to hear that he has planned to continue his education to pursue a further degree in engineering.

Knowing him very well as his former lecturer, I wholeheartedly recommend him for any opportunity to continue his study. I strongly believe that he will complete his continuing study program without any difficulty what so ever

Should you wish to get any further information, please feel free to contact me, and I will be very happy to respond to your inquiries.

With kindest regards,

**H. Rhiza S. Sadjad, Ir., M.S.E.E., Ph.D.**
