I know Ms. Rismawaty Arunglabi as a colleague in the Indonesian Christian University (UKI) Paulus, a neighboring university of Hasanuddin University where I myself have been with since 1983. I worked very closely with Ms. Arunglabi when she was appointed as the person in charge of a competitive research grant project called TPSDP, funded by the Asian Development Bank. It was a 4 (four) year project, and I assisted her as one of the research proposal reviewers. As the person in charge Ms. Arunglabi was trusted to supervise her fellow lecturers and students in conducting several research projects. She made her job done very well so this clearly showed the quality Ms. Arunglabi has in her personality as well as her strong motivation to do her duty. This also shows how much she values research works in education. Ms. Arunglabi has demonstrated that she has all the skills needed to complete the project successfully in a relatively very short time, with a good collaboration with her colleagues. She came to see me regularly to show the progress of the project, and in all these encounters she showed her openness to suggestions and an eagerness to engage in professional discussions that could enhance her understanding of the subject she is interested in. I see in her the many qualities of both an excellent engineer and an enthusiastic researcher. I have been so thoroughly impressed by Ms. Arunglabi's technical competence in her field, and that she showed a strong motivation to continue her study, I wholeheartedly recommend her for any opportunity to pursue a higher degree program in her field. Should you wish any further information, please feel free to contact me, and I will gladly respond to your inquiries.

Best Regards,

Rhiza S. Sadjad, Ph. D
