INTERNATIONAL SUMMER SCHOOL BRIDGES COLLABORATION BETWEEN THE FACULTY OF PHARMACY UNHAS AND KMCT COLLEGE OF PHARMACY INDIA IN PHARMACEUTICAL SCIENCES

Faculty of Pharmacy (FARMASI) Hasanuddin University (UNHAS) successfully organized the *International Summer School on Applied Pharmaceutical Sciences: From Experimental Pharmacology to Natural Product Research* from 15–22 May 2026, welcoming delegates from Kunhitharuvai Memorial Charitable Trust (KMCT) College of Pharmacy. The international academic program brought together six pharmacy students and one faculty member from India in a collaborative initiative aimed at strengthening global engagement in pharmaceutical education, research, and intercultural exchange.

This summer school served as an important platform to enhance scientific collaboration between Indonesia and India in the field of pharmaceutical sciences. The program combined academic lectures, laboratory immersion, cultural experiences, and student interaction to provide participants with comprehensive international exposure.

Participants explored various research facilities and laboratories, including pharmaceutical technology, phytochemistry, pharmaceutical chemistry, pharmacology, toxicology, and cosmetology laboratories. Through these activities, students gained direct insight into contemporary pharmaceutical research and laboratory practices at UNHAS.

The academic sessions also featured distinguished researchers from UNHAS, including Muhammad Aswad, Ph.D., who presented advances in chemical biology and medicinal chemistry research, as well as Yulia Yusrini Djabir, Ph.D., who shared insights into drug efficacy and medication safety research. These sessions fostered scientific discussion and encouraged future international research collaboration among participants.

Beyond the academic agenda, the international summer school also promoted intercultural understanding through cultural visits, traditional dance workshops, and interactions with pharmacy student organizations at UNHAS. As part of the cultural immersion program, participants from KMCT College of Pharmacy visited Fort Rotterdam, one of Makassar's most prominent historical landmarks and cultural heritage sites. During the visit, the participants explored the historical significance of the former Dutch colonial fortress, which now functions as a cultural and educational museum preserving the legacy of the Bugis-Makassar civilization. The cultural activities provided valuable opportunities for students to experience Indonesian traditions and local heritage while strengthening intercultural communication, friendship, and professional networks across institutions and countries, further enriching the international academic exchange experience.
The program concluded with a closing ceremony on 21 May 2026 attended by university leaders, faculty representatives, organizers, and participants. The successful implementation of the International Summer School reaffirmed the FARMASI UNHAS' commitment to advancing internationalization and fostering meaningful global partnerships in pharmaceutical sciences education and research.

INTERNATIONAL CLASS GUEST LECTURE ENHANCES KNOWLEDGE ON INTERCEPTIVE ORTHODONTIC CARE

The Faculty of Dentistry (FKG) Hasanuddin University (UNHAS) through their International Affairs Office, successfully organized an International Class Guest Lecture for the Biomechanics and Tooth Movement Course. The academic event featured Assoc. Prof. Dr. Saraswathy Devi Sinniah from the Faculty of Dentistry, Universiti Teknologi MARA (UiTM), Malaysia, as the invited speaker.

Held on Saturday, 2 May 2026, from 1:30 p.m. to 2:30 p.m. at Molar Room in the FKG UNHAS, the lecture attracted enthusiastic participation from undergraduate preclinical dental students and specialist residents, providing an excellent platform for international academic exchange and professional development. The guest lecture was attended also by faculty members from the FKG. Among the distinguished attendees were Muhammad Izzah Abdillah, drg., M.S., as moderator and Baharuddin M. Ranggang, drg., M.Kes., Sp.Ort., SubSp**.** DDPK(K), whose participation further enriched the academic discussions and reflected the faculty's commitment to fostering a collaborative learning environment and strengthening international academic engagement.

During the lecture, Assoc. Prof. Dr. Saraswathy Devi Sinniah delivered a presentation entitled “Guiding Growth Early: Navigating Interceptive Orthodontic Care and Referral Pathways in Children Using the Index for Interceptive Orthodontic Referral.” The session highlighted the importance of early identification and management of developing malocclusions in children, emphasizing evidence-based interceptive orthodontic treatment and appropriate referral strategies to optimize patient outcomes.

The lecture provided participants with valuable insights into growth modification, clinical decision-making, and the use of standardized referral indices in pediatric orthodontic care. Through real clinical examples and interactive discussions, students and residents gained a deeper understanding of how timely intervention can influence craniofacial development and improve long-term oral health.

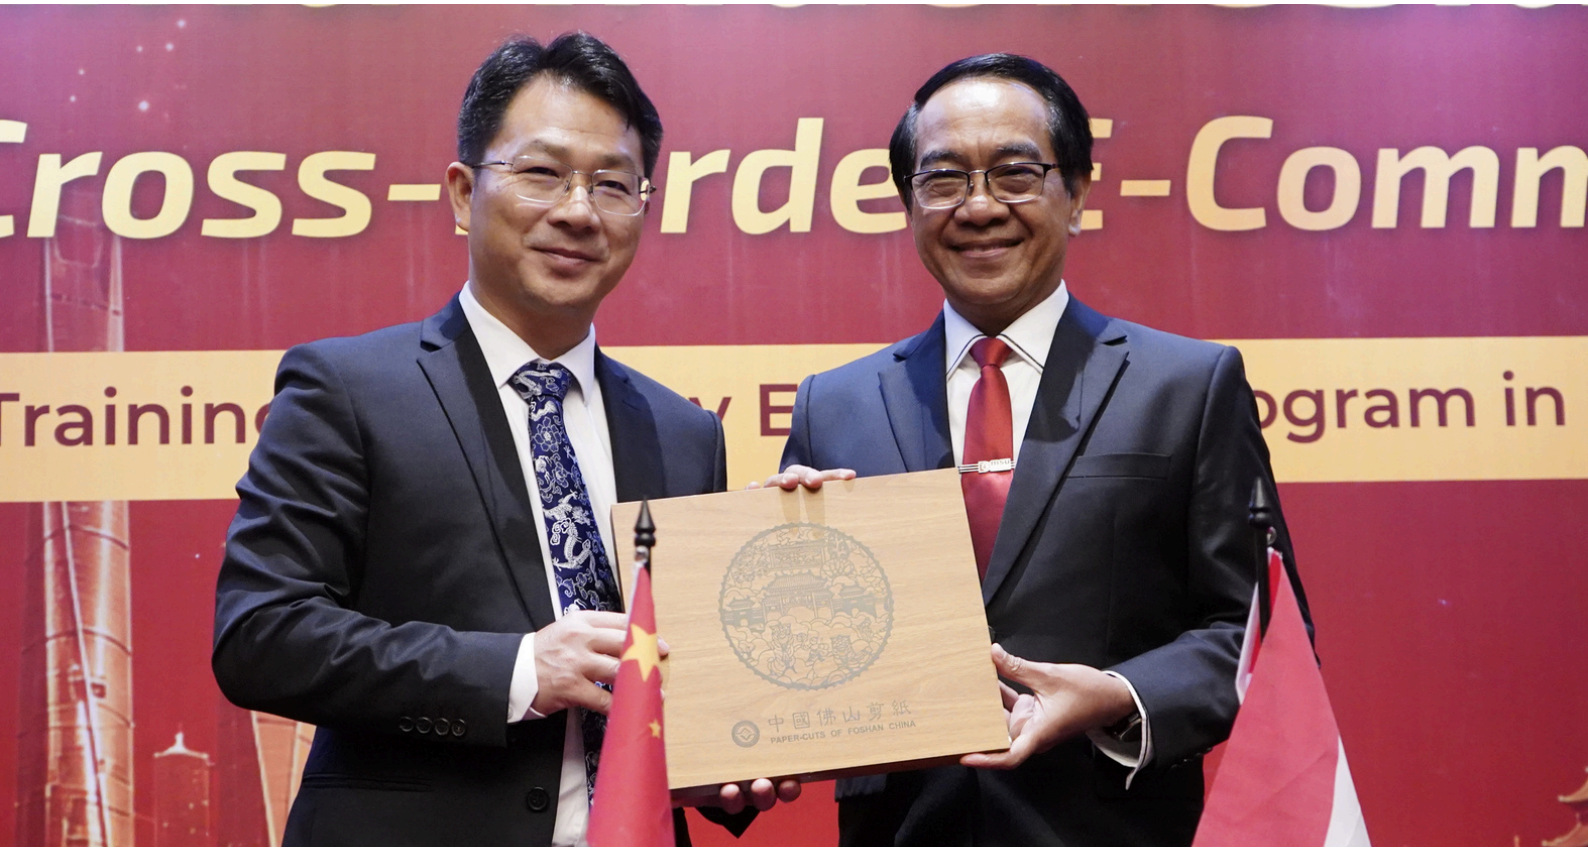

The event reflects the FKG UNHAS’ commitment to internationalization and academic excellence by fostering collaborations with leading institutions abroad. By engaging with distinguished scholars from international universities, students and residents are exposed to global perspectives and contemporary developments in dental education and clinical practice.

The discussion session that followed demonstrated the participants’ strong interest in interceptive orthodontics, with numerous questions regarding diagnosis, treatment timing, and interdisciplinary management of pediatric patients. The active exchange of ideas contributed to a stimulating learning environment and strengthened academic ties between UNHAS and Universiti Teknologi MARA.

UNHAS EXPANDS INTERNATIONAL PARTNERSHIP ON AI AND VOCATIONAL EDUCATION WITH CHINESE INSTITUTIONS

Hasanuddin University (UNHAS), through the Faculty of Vocational Studies (VOKASI), continues to strengthen its international engagement by establishing strategic collaboration with educational institutions and industry partners from China. The initiative reflects the university's commitment to advancing vocational education, industrial talent development, and technology-driven innovation in response to global industry transformation.

The partnership was formalized through the signing of a Memorandum of Understanding (MoU) involving Foshan Polytechnic, Guandong Bangpu Recycling Technology Co., Ltd Indonesia Buri Base, and the Vokasi. The collaboration forms part of the international "1 + 10 + 100 + 1,000 + 10,000 Project," a program designed to enhance vocational education ecosystems through industrial collaboration, technology transfer, and human resource development in the era of artificial intelligence (AI) and digital transformation.

The MoU signing was conducted by the Rector of UNHAS, Prof. Dr. Ir. Jamaluddin Jompa, accompanied by the Dean of the VOKASI, Prof. Dr. Ir. Muh. Restu, during the "China–Indonesia AI + Cross-Border E-Commerce Localization Training and Industry Exchange Program in Indonesia" held at Novotel Jakarta Pulo Mas on Tuesday (19/5).

Beyond institutional cooperation, the partnership is expected to create broader opportunities for applied research, industry-oriented curriculum development, professional training, and graduate competency enhancement. The collaboration also aims to prepare students and young professionals to compete within an increasingly digital and globally connected workforce.

During the event, Suparto from Indonesia's Ministry of Higher Education, Science, and Technology highlighted the growing influence of artificial intelligence in reshaping industries worldwide. He emphasized the strategic role of vocational education in preparing future talent capable not only of understanding emerging technologies but also of driving innovation and transformation within industries.

According to Suparto, Indonesia and China share a common vision in developing future-ready human resources with strong competencies in AI and digital industry practices. Cross-border collaboration between educational institutions and industries, he noted, plays an essential role in accelerating knowledge exchange, strengthening workforce capabilities, and enhancing global competitiveness.

Through this international collaboration, VOKASI UNHAS seeks to further expand its global partnerships while reinforcing its role in producing industry-ready graduates equipped for the challenges of the digital and AI-driven economy.

INTERNATIONAL GUEST LECTURE AT UNHAS: ADVANCING CARDIOMETABOLIC HEALTH THROUGH GLOBAL COLLABORATION

Through the Division of Publication, Community Service, and International Affairs, the Faculty of Medicine (FK), Hasanuddin University (UNHAS) successfully held an International Guest Lecture on Friday, 22 May 2026. The event took place at the Prof. Amiruddin Auditorium of FK UNHAS, featuring an international keynote speaker, Dr. Hairulnizam Ibrahim from the International Medical School, Management and Science University (MSU), Malaysia.

The event was officially opened by the Vice Dean for Publication, Community Service, and International Affairs of the FK UNHAS, Prof. Dr. dr. Rina Masadah, Sp.PA(K)., M.Phil., DFM. In her remarks, she emphasized the importance of international collaboration and knowledge exchange in enhancing the quality of medical education, as well as broadening the horizons of students and the academic community.

On this occasion, Dr. Hairulnizam Ibrahim delivered a presentation titled “Physical Activity and Cardiometabolic Health: From Mechanism to Clinical Application.” The lecture was attended by undergraduate students enrolled in the Community Medicine course, along with faculty lecturers. The material presented explored the relationship between physical activity and cardiometabolic health, spanning from biological mechanisms to clinical implementations in disease prevention and management. Participants showed great enthusiasm throughout the presentation and the interactive discussion session that followed.

This International Guest Lecture is expected to serve as a platform for academic development and to strengthen the international network between FK UNHAS and foreign educational institutions.

INTERNATIONAL GUEST LECTURE HIGHLIGHTS ORTHODONTIC MANAGEMENT FOR CHILDREN WITH CLEFT

The Faculty of Dentistry (FKG), Hasanuddin University (UNHAS), in collaboration with the Faculty of Dentistry, University of Malaya (UM), successfully organized an international guest lecture entitled "Orthodontic Treatment for Children with Cleft" for residents of the Pediatric Dentistry and Orthodontics Specialist Programmes.

The lecture was delivered by Prof. Dr. Siti Adibah Othman from the Faculty of Dentistry, University of Malaya, Malaysia, a renowned expert in orthodontics and craniofacial care. The session was moderated by Andi Sri Permatasari, drg., Sp.KGA. The event was held on Saturday, 2 May 2026, from 10:00 a.m. to 12:00 p.m. at Acacia 1 & 2 Room, Claro Hotel, Makassar. The guest lecture was organized as part of the academic activities of the 19th International Indonesian Pediatric Dentistry Association Conference (iiPDAC 19), bringing together experts, academics, and residents to discuss current developments in pediatric dental care and interdisciplinary treatment approaches.

The guest lecture aimed to enrich the knowledge and clinical competence of postgraduate residents in managing orthodontic treatment for children with cleft lip and palate. During her presentation, Prof. Siti Adibah Othman discussed contemporary evidence-based treatment approaches, interdisciplinary care pathways, and clinical considerations in treating pediatric patients with cleft conditions.

The event was attended by academic staff and residents from both the Pediatric Dentistry and Orthodontics Specialist Programmes. Distinguished faculty members present included Prof. Dr. Fajriani, drg., M.Si., Sp.KGA, Head of the Pediatric Dentistry Specialist Programme, and Dr. Ardiansyah S. Pawinru, drg., Sp.Ort., Subsp.DDTK (K), Head of the Orthodontics Specialist Programme, along with lecturers and residents from both departments. Their participation reflected the strong commitment of the Faculty of Dentistry, UNHAS, to fostering academic excellence and international collaboration.

An engaging discussion session followed the lecture, allowing participants to exchange ideas and explore real clinical cases involving children with cleft lip and palate. The interactive atmosphere encouraged critical thinking and strengthened participants' understanding of multidisciplinary treatment planning.This academic activity serves as an important platform for international knowledge exchange and reinforces the long-standing collaboration between UNHAS and UM. Through exposure to global expertise, residents are expected to further develop their competencies in delivering comprehensive and patient-centered orthodontic care for children with craniofacial anomalies.

FACULTY OF VOCATIONAL STUDIES SIGNS STRATEGIC PARTNERSHIP WITH SUPERMAP AND PT NUSANTARA MEDIA INFORMATIKA

The Faculty of Vocational Studies (VOKASI) of Hasanuddin University (UNHAS) officially signed a cooperation agreement with SuperMap Software Co., Ltd. and PT Nusantara Media Informatika on Tuesday, 12 May 2026, at the Meeting Room of the VOKASI UNHAS. The partnership marks a strategic step toward strengthening collaboration in education, geospatial technology development, and competency enhancement for students and lecturers, particularly within the Remote Sensing and Geographic Information Systems Study Program (PJSIG).

The signing ceremony was attended by the leadership of the VOKASI UNHAS, academic staff, and representatives from industry partners. Representing SuperMap International were Evelyn Sun and Della Monica. Meanwhile, Widodo attended on behalf of PT Nusantara Media Informatika. The event was also attended by Gilang Widya Wisaksana from PT Leica Geosystems Indonesia.

This collaboration aims at supporting the implementation of the university's Three Pillars of Higher Education (Tridharma) through partnerships in education, research, training, certification, human resource development, and the implementation of industry-based geospatial technologies. Furthermore, the cooperation is expected to create opportunities for student internships, laboratory development, and capacity building to better prepare graduates for the evolving demands of the geospatial industry.

During the meeting, SuperMap International and Leica Geosystems Indonesia also expressed their commitment to supporting the development of the PJSIG Study Program through the establishment of a collaborative geospatial laboratory with the Vocational Faculty of UNHAS. The initiative is expected to provide state-of-the-art learning facilities, strengthen students' practical and research experiences, and foster innovation in the fields of remote sensing and geographic information systems.

Dean of the Vocational Faculty, Prof. Dr. Ir. Muh. Restu MP, stated that collaboration with international and national partners is part of the faculty's commitment to delivering education that remains adaptive to technological advancements and industry needs.

Through this partnership, the VOKASI UNHAS hopes to expand its strategic international network and further strengthen the position of the PJSIG Study Program as one of Indonesia's leading vocational programs in remote sensing and geographic information systems.

UNHAS PEDIATRIC DENTISTRY SPECIALIST STUDENTS SHINE AT INTERNATIONAL SCIENTIFIC AWARD COMPETITION

Students from the Pediatric Dentistry Specialist Program, Faculty of Dentistry (FKG) Hasanuddin University (UNHAS), achieved remarkable success at the Scientific Award Competition held during The 19th International Indonesian Pediatric Dentistry Association Conference (iiPDAC 19). The international conference, held in Makassar from 29 April to 2 May 2026, brought together leading pediatric dentistry experts, researchers, academicians, and practitioners from across Indonesia and abroad to exchange knowledge and discuss the latest developments in pediatric oral healthcare.

The conference was further honored by the presence of Prof. Kitae Park, President of the Pediatric Dentistry Association of Asia (PDAA), who attended as a distinguished guest and speaker. As part of the Scientific Award ceremony, Prof. Park personally presented awards to the head of study Program and also the winners and generously provided internationally recognized pediatric dentistry textbooks as special prizes, encouraging young researchers and clinicians to continue advancing scientific excellence in the field.

The outstanding achievements of the Pediatric Dentistry Specialist Program students reflected their strong academic capabilities, research competence, and commitment to scientific advancement. Competing with participants from various institutions, the students secured multiple awards in several scientific categories.

In the Scoping Review category, drg. Normayanti Sukma was awarded 1st Winner, while drg. Aliefah Putri Lestari earned 2nd Winner. drg. Suci Haryati Amiruddin received 3rd Winner, and drg. Dwi Fitrah Ariani Bahar achieved 2nd Runner-Up. These accomplishments demonstrate the students' ability to conduct high-quality evidence synthesis and contribute meaningful scientific insights to pediatric dentistry.

The students also excelled in the Case Report category. drg. Enny Febry Sartika Lumuhu received 2nd Runner-Up in the AIBK category, while drg. Grace Hilda Sondakh achieved 3rd Winner in the same category. In the PKOA category, drg. Vidiana Aren S. secured 2nd Runner-Up, highlighting the quality of clinical documentation, analysis, and presentation demonstrated by the students.

Beyond scientific achievements, the Pediatric Dentistry Specialist Program students showcased their creativity and cultural spirit by winning 1st Place in the Tabola Bale Dance Competition. The delegation also received the Best Supporter Award, earning 1st Place for their enthusiasm, teamwork, and active participation throughout the conference.

These achievements underscore the FKG UNHAS' commitment to fostering academic excellence, research innovation, and professional development among its specialist students. The recognition received at an international forum such as iiPDAC 19 not only brings pride to the institution but also strengthens its contribution to the advancement of pediatric dentistry at both regional and international levels.

The FKG UNHAS extends its heartfelt congratulations to all award recipients and acknowledges the invaluable support of faculty members, supervisors, and mentors who guided the students throughout their academic journey. It is hoped that these accomplishments will inspire future generations of pediatric dentistry specialists to pursue excellence in research, clinical practice, and lifelong learning for the improvement of children's oral health worldwide.

FACULTY OF DENTISTRY UNHAS HOSTS KMCT DENTAL COLLEGE DELEGATION THROUGH INTERNATIONAL STUDENT EXCHANGE PROGRAM AND GUEST LECTURE

The Faculty of Dentistry (FKG), Hasanuddin University (UNHAS) welcomed a delegation of faculty members and students from Kunhitharuvai Memorial Charitable Trust (KMCT) Dental College, India, for a six-day inbound student exchange program aimed at promoting academic collaboration, cultural understanding, and international exposure in dental education.

The delegation was led by Prof. Dr. Ranjith, BDS., MDS, accompanied by six dental students: Fathma Muhammad Aboobacker, Sadheeda Hamza, Sarangi Santhosh, Aleena Thomas Kannamplavil, Elizabeth Sneha, and Fathima Rageena. Throughout their stay in Makassar, the participants engaged in a series of academic, clinical, and cultural activities organized by the Faculty of Dentistry UNHAS.

The official program commenced on May 18, 2026, with an Opening Ceremony attended by the Dean of the Faculty of Dentistry, UNHAS, faculty members, and representatives from both institutions. The ceremony marked the beginning of a collaborative learning experience between students and academics from Indonesia and India.

Following the opening session, the delegation attended an orientation program introducing UNHAS and its internationalization initiatives. The session was delivered by Andi Masyitha Irwan, S.Kep, Ns, Ph.D as Head of the International Office (IO), who provided an UNHAS overview, student life, and Indonesian cultural values. In the afternoon, the visiting students participated in a Focus Group Discussion (FGD) with clinical dental students, creating opportunities for academic exchange, discussion of educational experiences, and intercultural interaction.

On 19 May 2026, Prof. Dr. Ranjith delivered a Guest Lecture attended by clinical students and residents from several specialist training programs (PPDGS), including the Prosthodontics Specialist Program. During the lecture, Prof. Ranjith shared valuable insights into contemporary dental practice and specialist education, encouraging participants to adopt evidence-based and patient-centered approaches in clinical care.

The academic session was followed by a Dental Hospital Visit to the UNHAS Dental Hospital (RSGMP UNHAS). The delegation toured various clinical departments and specialty clinics, gaining firsthand exposure to the hospital's facilities and patient management systems. The visit included observation of the operating theatre, where participants learned about surgical procedures and multidisciplinary treatment planning. A case discussion session was also conducted between students and faculty members from both institutions, facilitating the exchange of clinical perspectives and experiences in managing complex dental cases.

On 20 May 2026, the delegation joined a Suturing Workshop organized by the Department of Oral and Maxillofacial Surgery. The hands-on training introduced participants to fundamental suturing techniques and surgical principles commonly applied in oral surgical procedures. The workshop provided valuable practical experience and strengthened participants' clinical skills.

The final academic activity took place on 21 May 2026, when the visiting students attended a Rubber Dam Workshop organized by the Department of Conservative Dentistry. Through demonstrations and practical exercises, participants learned the importance of rubber dam isolation in restorative and endodontic procedures, as well as techniques to improve treatment efficiency and patient safety.

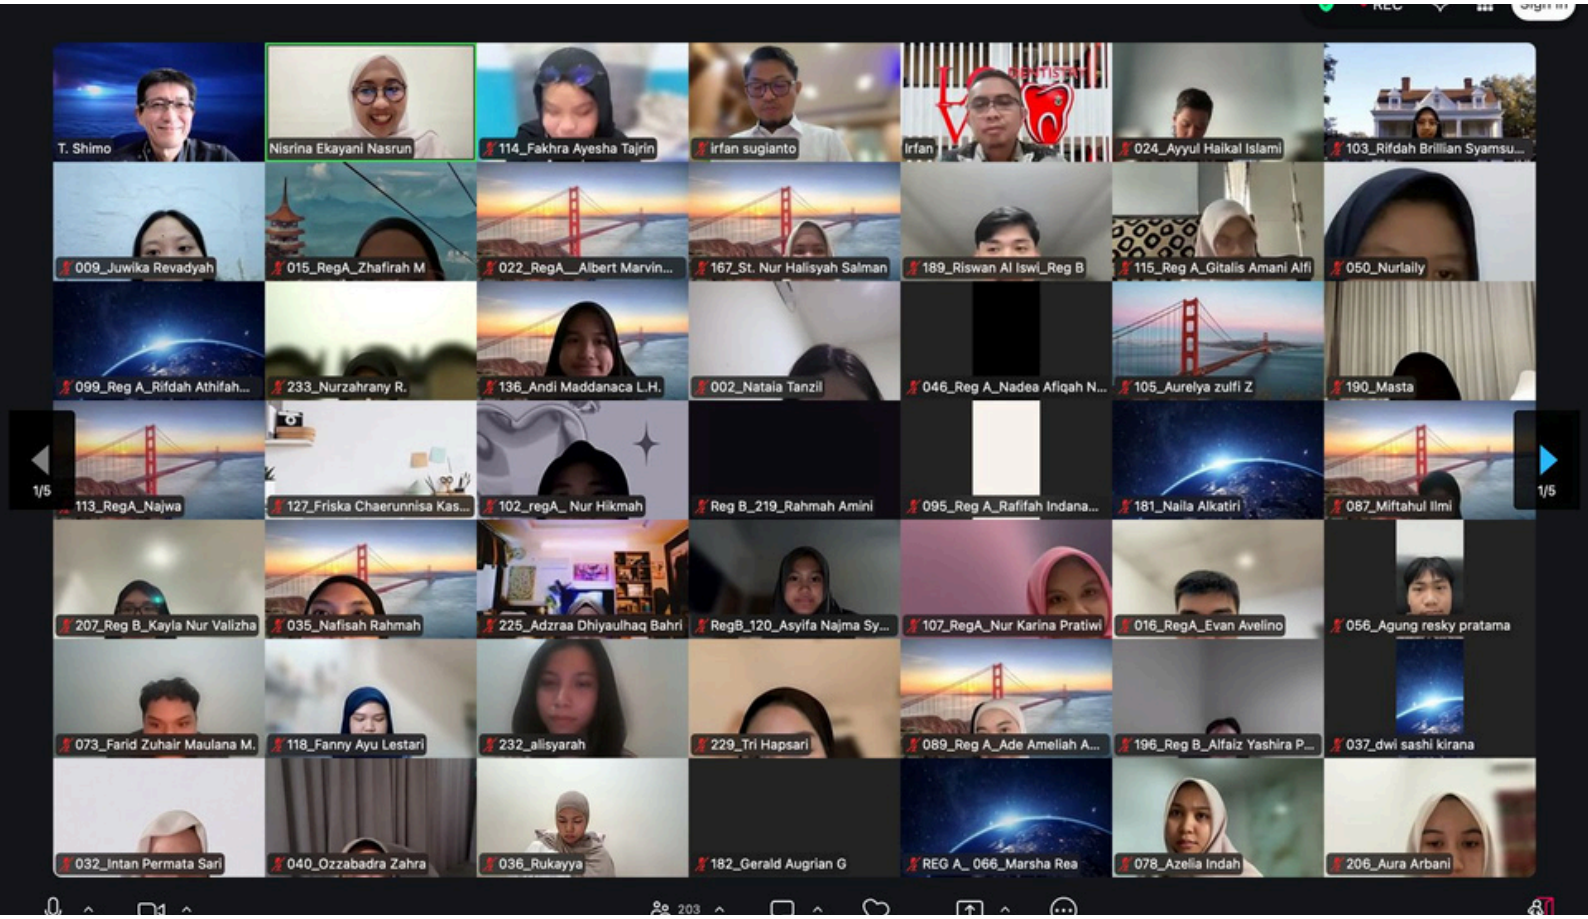

The program concluded on 21 May 2026, with a Closing Ceremony. The event was attended by the Vice Rector of UNHAS, representatives from IO, faculty members, and participants from both institutions. The closing ceremony served as a celebration of the successful academic and cultural exchange program and highlighted the strong partnership between UNHAS and KMCT Dental College.

One of the highlights of the ceremony was a series of cultural performances presented by students from both universities. The participants showcased traditional songs, dances, and cultural presentations that reflected the rich heritage of Indonesia and India. These performances fostered mutual understanding, friendship, and appreciation of cultural diversity, creating a memorable conclusion to the international exchange program.

During the ceremony, representatives from both institutions expressed their appreciation for the collaboration and emphasized the importance of continuing international partnerships in education, research, and student mobility. The event ended with the exchange of souvenirs, group photographs, and farewell remarks, marking the successful completion of the six-day exchange program.

Throughout the program, students from both institutions actively exchanged knowledge, experiences, and cultural perspectives. The activities not only enhanced participants' academic and clinical competencies but also strengthened friendships and professional networks across borders.
The successful implementation of the exchange program reflects the shared commitment of UNHAS and KMCT Dental College to fostering international collaboration in dental education, research, and professional development. Both institutions expressed their enthusiasm for expanding future partnerships through student mobility programs, academic exchanges, and joint educational initiatives.

INTERNATIONAL CLASS GUEST LECTURE EXPLORES MODERN TECHNIQUES IN TOOTH EXTRACTION

The Faculty of Dentistry (FKG), Hasanuddin University (UNHAS), through its International Affairs Office, successfully organized an International Class Guest Lecture for the Minor Oral Surgery Course, featuring Prof. Tsuyoshi Shimo, DDS., Ph.D. from the Division of Reconstructive Surgery for Oral and Maxillofacial Region, School of Dentistry, Health Sciences University of Hokkaido, Japan.

The online lecture was held on Friday, 22 May 2026, and brought together undergraduate dental students, postgraduate residents, and faculty members from the Faculty of Dentistry, UNHAS. The event served as an important platform for international academic exchange and knowledge sharing in the field of oral and maxillofacial surgery.

During the session, Prof. Shimo delivered a lecture entitled “Closed Method Tooth Extraction: Instruments and Procedures.” The presentation provided a comprehensive overview of the principles and techniques of closed tooth extraction, including the selection and proper use of extraction instruments, surgical procedures, patient assessment, and strategies for minimizing complications during treatment.

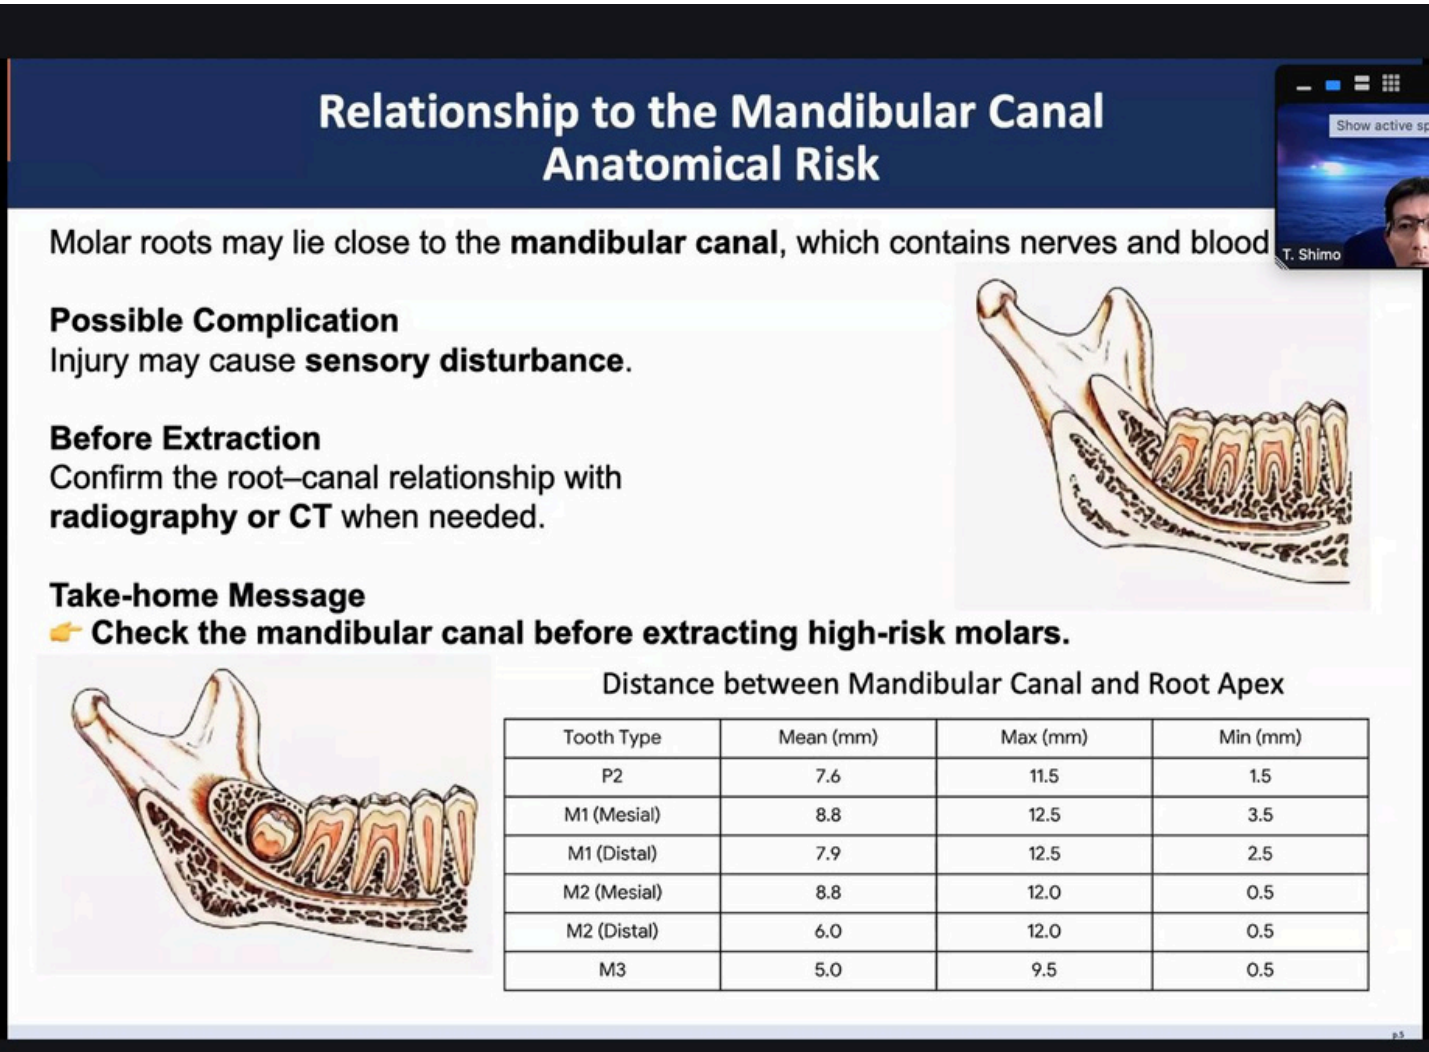

Drawing on his extensive clinical and academic experience, Prof. Shimo emphasized the importance of mastering fundamental extraction techniques as a cornerstone of oral surgical practice. Participants gained valuable insights into evidence-based approaches, procedural efficiency, and patient safety considerations that are essential for successful tooth extraction procedures.

The lecture also highlighted advances in clinical practice and the role of proper treatment planning in achieving predictable outcomes. Through detailed explanations and clinical examples, participants were encouraged to develop a deeper understanding of oral surgery principles and their application in everyday dental practice.

The interactive question-and-answer session that followed allowed students and residents to engage directly with the speaker. Participants discussed clinical challenges, case management strategies, and best practices in minor oral surgery, creating a dynamic learning environment and fostering meaningful academic dialogue between Indonesia and Japan.

This international lecture reflects the FKG UNHAS' commitment to enhancing the quality of dental education through global collaboration. By connecting students and residents with internationally recognized experts, the faculty continues to provide opportunities for exposure to contemporary knowledge, research developments, and clinical innovations in dentistry.

The event also strengthened the academic relationship between UNHAS and the Health Sciences University of Hokkaido, paving the way for future collaborations in education, research, and professional development.

Meet Our Stuvo !

My Journey as an IO Student Volunteer:

Fidya Fazriani Harahap
Faculty of Agriculture

Sometimes, great opportunities begin with simple moments. For me, it started with an Instagram story posted by a friend. At the time, I never imagined that a brief moment of curiosity would lead me to become part of the Student Volunteer (STUVO) program at the International Office (IO) of Hasanuddin University (UNHAS).

After seeing the recruitment announcement for STUVO Batch IV, I became curious and explored the IO UNHAS Instagram account. I discovered many exciting and meaningful activities that immediately caught my interest. It was my first time learning about a volunteering program dedicated to supporting international students, and I realized it would be a valuable opportunity to gain new experiences.

Since I had never interacted directly with foreigners before, I felt that this would be the perfect chance for me to step out of my comfort zone and develop my communication skills. Participating in international activities is not something we can experience every day, and I found this as a rare and valuable opportunity to learn and grow. Thus, I decided to take the chance and apply for it.

Although I felt a little bit nervous at first because I'm really sure that everyone who's participating in this recruitment must be talented students from many faculties at UNHAS. However, my curiosity and eagerness encouraged me to join. I wanted to help international students adapt to university life while learning how international programs and events are organized at UNHAS. Fortunately, I was accepted as part of the STUVO. I felt both nervous and excited as I waited for the result. Seeing the word "Congratulations" at the beginning of the email felt unreal. I was genuinely happy, grateful, and surprised to become part of the IO UNHAS family.

Being part of the STUVO IO has taught me that sometimes you need a few small steps to get big valuable experiences, and to have done something that you think is heavy, the solution is only “you have to try”, because when you are worried too much and only keep it up in your head, the thing will get more heavier and you’ll never get over it. Sometimes, overthinking will make things feel heavier than they actually are, while taking the first step can open the door to growth and new opportunities.

I never thought that because of my simple curiosity, seeing a friend’s Instagram story would bring me such an amazing opportunity to get valuable experiences and meet fellow volunteers. Through the activities we shared together, I was able to create many meaningful moments and memories with them. I am truly grateful to have met such amazing people in my life and to have the opportunity to work and grow together with them through this STUVO journey. I also wanted to say thank you to all the fellow volunteers for all the hard work we have shared and for creating such a supportive environment for both of us through this experience.
