INTERNATIONAL OFFICE HOLDS PRE-ARRIVAL ORIENTATION FOR THE 9TH INTERNATIONAL CULTURAL PROGRAM PARTICIPANTS

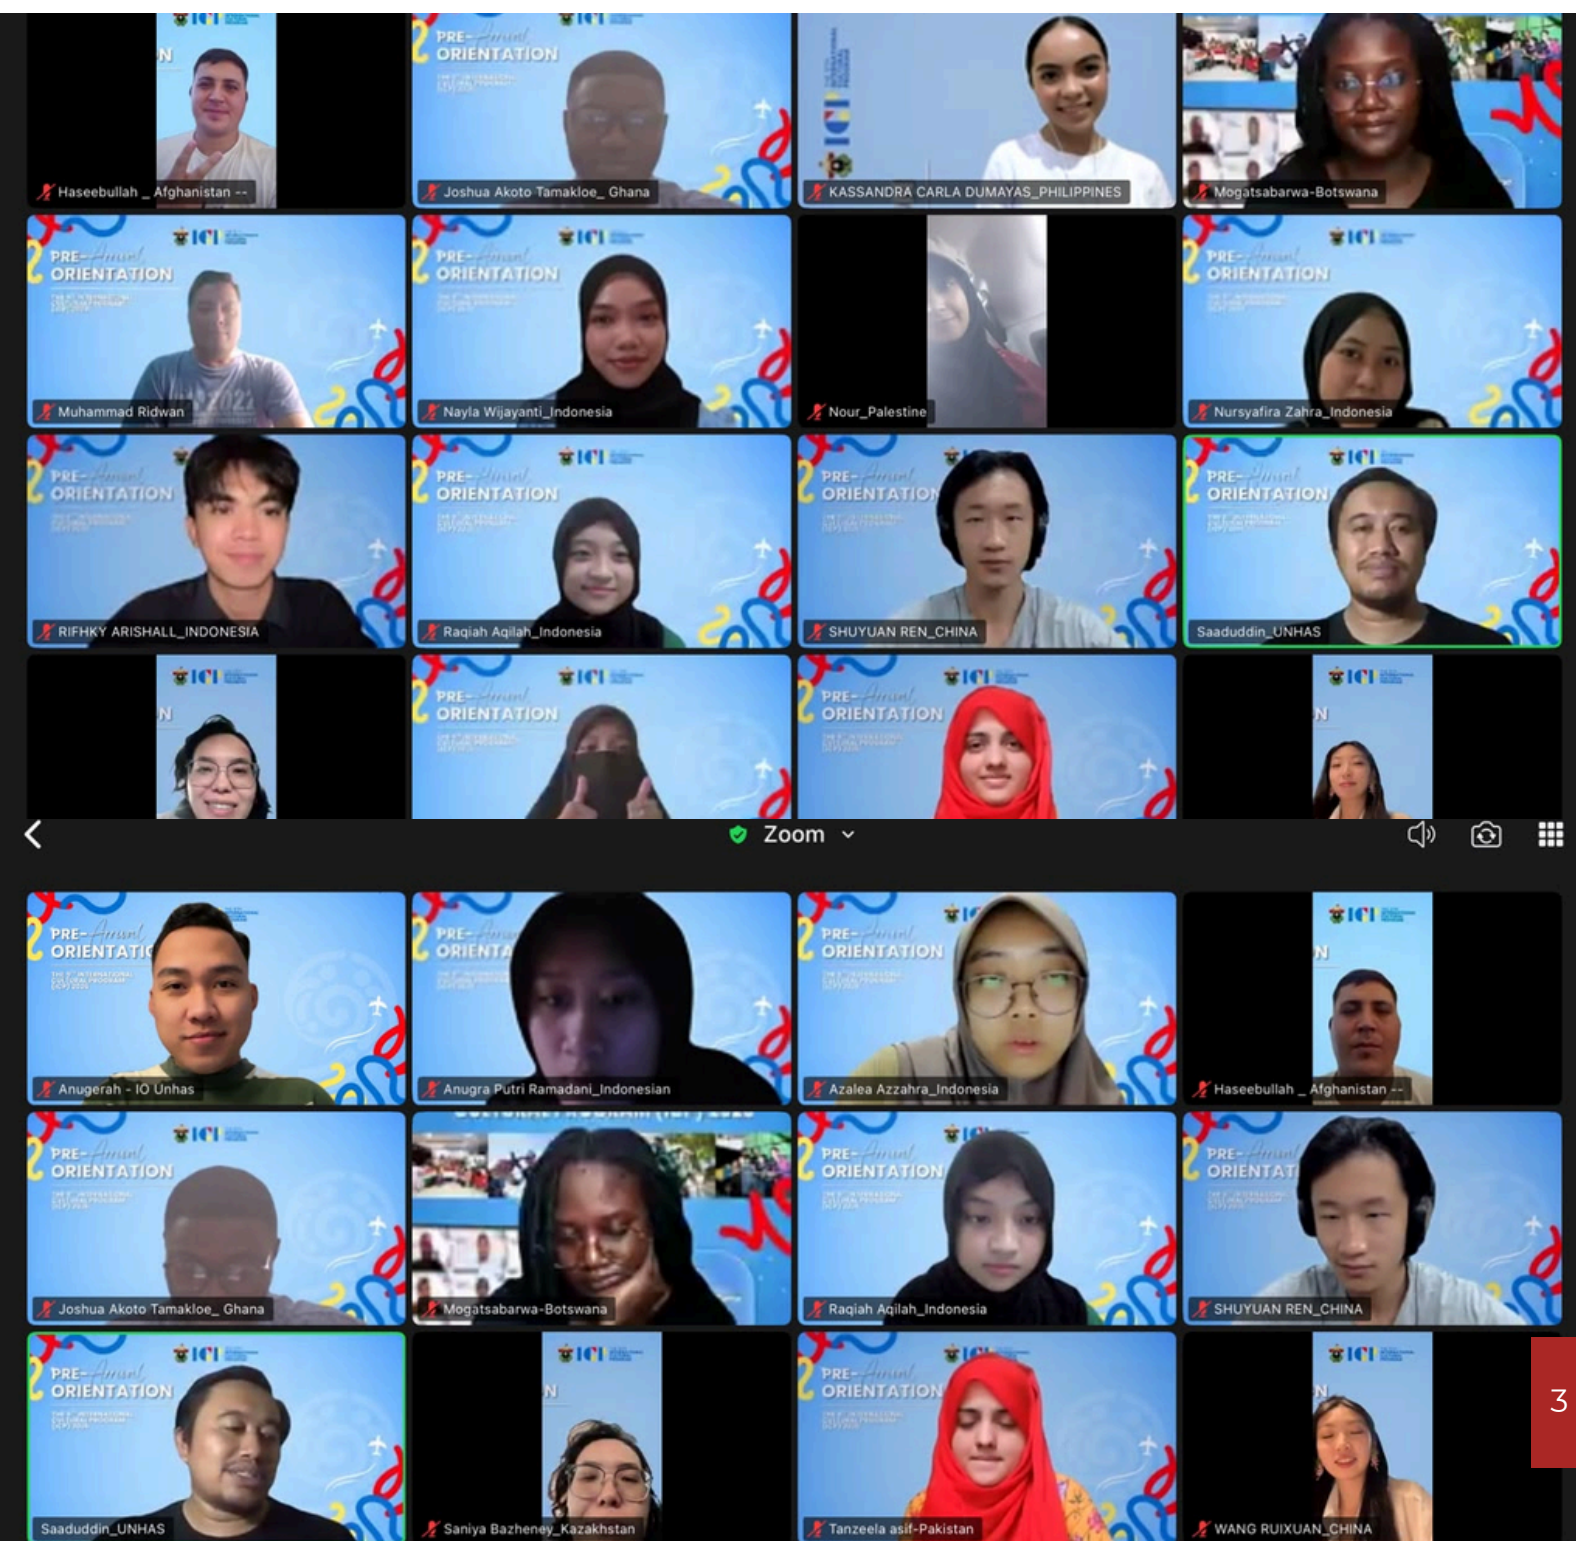

Following the confirmation of participation from all delegates of the 9th International Cultural Program (ICP), the International Office (IO) of Hasanuddin University (UNHAS) organized a Pre-Arrival Orientation (PAO) on Saturday, 6 June 2026, through the Zoom platform. The orientation was attended by all participants and served as an important preparatory session before their arrival in Indonesia for the program.

The PAO was facilitated by Saaduddin, Ph.D., the ICP Project Manager. The session also featured Muhammad Ridwan, M.A., Secretary of the IO, along with members of the IO staff and the International Office Student Volunteers (Stuvo). In his welcoming remarks, Muhammad Ridwan, affectionately known as Ridho, expressed his appreciation to all participants for joining the program and encouraged them to make the most of the orientation session.

During the presentation session, Saaduddin, widely known as Mr. Saad, shared a comprehensive overview of the program through a PowerPoint presentation. He explained the objectives of the Pre-Arrival Orientation and provided detailed information regarding the activities scheduled in two locations: the City of Makassar and the Selayar Islands Regency. He also showcased highlights from previous ICP programs held in Puntondo, Takalar Regency.

Mr. Saad emphasized that for the past three years, the ICP had been conducted in Puntondo, while the 2026 edition would offer participants a new experience in the Selayar Islands. He further explained that this year's program continues to uphold its core focus on the maritime culture of South Sulawesi, a theme that has remained central to the ICP over the years. The presentation was followed by an interactive Question and Answer (Q&A) session, during which participants raised various inquiries that were addressed thoroughly and clearly by Mr. Saad.

Prior to the orientation, the IO had conducted a series of coordination meetings with the Stuvo team to ensure the successful implementation of the program. The PAO concluded with a virtual group photo session, marking the beginning of the participants' journey with the 9th ICP. The IO looks forward to welcoming all participants to Makassar and hopes for their smooth and safe arrival.

STRENGTHENING INDONESIA-AUSTRALIA COLLABORATION THROUGH HIGHER EDUCATION, RESEARCH, AND ALUMNI NETWORKS: PUBLIC LECTURE BY THE AUSTRALIAN CONSUL-GENERAL IN MAKASSAR.

On Tuesday, 19 May 2026, a public lecture was held at the Doctoral Promotion Room, 3rd Floor, Faculty of Law (FH), Hasanuddin University (UNHAS). The event commenced with opening remarks delivered by Prof. Dr. Birkah Latif, S.H., M.H., LL.M., Head of the Department of International Law, Faculty of Law UNHAS, followed by a public lecture presented by the Australian Consul-General in Makassar, Mr. Todd Dias. The discussion session was moderated by Alif Imam Dzaki, S.H., M.I.L. and Nuriyah Fara Muthia, S.H., M.H.

The longstanding relationship between Indonesia and Australia dates back to Indonesia's early years of independence. This is reflected in Australia's first international role at the United Nations following World War II, when it supported Indonesia's diplomatic efforts in securing independence amid the threat of renewed Dutch military aggression.

Today, Indonesia-Australia cooperation continues to flourish, particularly in the fields of education and research. Higher education institutions, including UNHAS as one of the largest universities in Eastern Indonesia, play an important role in strengthening these ties. One tangible example of this collaboration is that several lecturers from the Department of International Law, FH UNHAS, are graduates of Australian universities through the Australian Awards Scholarship (AAS) program.

During his presentation, Mr. Todd Dias addressed a common perception that the Australian Government places greater emphasis on Java Island while giving less attention to other regions, particularly Eastern Indonesia. As a result, many AAS applicants often write scholarship essays discussing their potential contributions to “Eastern Indonesia for Australia.” According to Dias, this perception stems from the assumption that most AAS recipients come from Java.

He further highlighted that research collaboration remains a key priority in Indonesia–Australia relations, especially in Eastern Indonesia. However, most collaborative research projects currently focus on the natural and applied sciences, while social sciences and humanities, including public policy and law, receive less attention. One significant challenge is conducting research on public policy implementation that can serve as a framework for governments across Eastern Indonesia.

Responding to a question on how to strengthen AAS alumni networks to support Indonesia–Australia cooperation, Dias emphasized the importance of encouraging engagement among AAS alumni in Makassar and other regions. In addition to alumni gatherings organized by the Australian Consulate-General, organizations such as IKAMA (Australian Alumni Association) can play a crucial role. One notable member is Prof. Jamaluddin Jompa, Rector of UNHAS, who can help drive collaborative initiatives aimed at advancing development in Eastern Indonesia.

Australia also offers grant programs that enable alumni to implement collaborative projects with direct societal impact. These projects may involve partnerships with Australian institutions such as the University of Sydney and other universities. Such initiatives align with the Australian Government’s objective of generating positive contributions to Indonesia’s development.

When asked about opportunities for students to pursue further studies and employment in Australia, Dias explained that international students are permitted to work while studying. Under current regulations, students may work up to 48 hours per fortnight. This allows students to gain valuable professional experience through employment and internships while completing their studies.

Although Dias noted that he is not a legal expert, he highlighted that several Indonesian citizens have successfully built careers in the Australian legal sector, including a South Sulawesi native who is now practicing as a lawyer in Melbourne. Furthermore, several major Indonesian law firms maintain partnerships with Australian law firms, particularly in the commercial law sector. This cooperation aligns with Australia's objective of encouraging Indonesian investment in Australia and vice versa. Consequently, significant opportunities exist for Indonesian graduates seeking careers in Australia, especially in commercial law firms that assist Australian investors operating in Indonesia.

Several pathways are available for those interested in working in Australia. The first is the Working Holiday Visa (WHV) program. However, applicants seeking employment in the legal profession may face challenges, as legal practitioners must obtain approval from the relevant legal authorities within Australia's states and territories. The second pathway is through internship visas, which constitute one of the Australian Government's primary programs and offer larger intake quotas. The third pathway is exchange programs, which are commonly established between companies or between law firms. These opportunities demonstrate the broad and growing scope of Indonesia-Australia cooperation.

Dias also outlined several strategies to further strengthen connections between Indonesia and Australia. One approach is through social media outreach, particularly via the Instagram account @konjenmakassar, which regularly promotes scholarship opportunities, research collaborations, and exchange programs. Upcoming initiatives, such as the Western Sydney University (WSU) Surabaya Campus program, will also be promoted through these channels.

Additionally, Dias encouraged stakeholders to share ideas for Indonesia-Australia cooperation initiatives. While he may not be able to directly facilitate partnerships between UNHAS and Australian universities, he emphasized his willingness to support communication efforts by providing references, recommendations, and guidance to relevant institutions.

The public lecture generated significant enthusiasm among students, who actively participated in the discussion and expressed their hope that similar academic activities would continue to be organized by the Faculty of Law UNHAS in the future.

EXPLORING ADVANCES IN OSTEOLOGY RESEARCH: CHIANG MAI UNIVERSITY PROFESSOR SHARES EXPERTISE WITH UNHAS STUDENTS

INTERNATIONAL CLASS GUEST LECTURE

"For Ethics, Law and Forensic
Dentistry Course"

Speaker:

**Prof. Dr. Pasuk
Mahakkanukrauh , M.D**

Faculty of Medicine,
Chiang Mai University, Thailand

***"ADVANCED OSTEOLOGY RESEARCH
IN THAILAND"***

Friday, June 5th, 2026
12.00 PM (Thailand Time) / 13:00 WITA

As part of its ongoing efforts to enhance global learning opportunities, the Faculty of Dentistry (FKG), Hasanuddin University (UNHAS), organized an International Class Guest Lecture for the Ethics, Law and Forensic Dentistry Course on 5 June 2026. The online academic session brought together students and faculty members to learn from an internationally recognized expert in forensic and medical sciences.

The lecture featured Prof. Dr. Pasuk Mahakkanukrauh, M.D., from the Faculty of Medicine, Chiang Mai University, Thailand, who delivered a presentation entitled "Advanced Osteology Research in Thailand." Conducted via Zoom at 1:00 PM WITA (12:00 PM Thailand Time), the event provided participants with valuable insights into contemporary developments in osteological research and its applications in forensic science.

During her presentation, Prof. Pasuk introduced participants to the latest trends and innovations in osteology research in Thailand. She explained how the scientific study of human skeletal remains contributes to forensic identification, anthropological investigations, and medico-legal case analysis. Drawing upon her extensive research experience, she shared examples of multidisciplinary collaborations that have advanced the field and improved the accuracy of forensic investigations.

The lecture generated enthusiastic participation from students enrolled in the international class program as well as those studying ethics, law, and forensic dentistry. Participants actively engaged in the discussion session, raising questions about research methodologies, ethical considerations in forensic investigations, and future opportunities for international collaboration in forensic science research.

Beyond providing academic enrichment, the activity also strengthened the relationship between UNHAS and Chiang Mai University. The guest lecture highlighted the importance of international partnerships in promoting knowledge exchange, research collaboration, and cross-cultural understanding among future healthcare professionals.

Organized by the FKG UNHAS, the event reflects the institution's commitment to preparing students for an increasingly globalized academic and professional environment. Through interactions with distinguished scholars from leading international universities, students gain broader perspectives that complement their classroom learning and inspire future research endeavors.

STRENGTHENING INTERNATIONAL COLLABORATION: UNHAS PUBLIC ADMINISTRATION MASTER'S PROGRAM AND UITM FSPP HOLD INTERNATIONAL COLLOQUIUM ON POLICY AND GOVERNANCE

The Master of Public Administration (MAP) Program of the Faculty of Social and Political Sciences (FISIP), Hasanuddin University (UNHAS), in collaboration with the Faculty of Administrative Science and Policy Studies (FSPP), Universiti Teknologi MARA (UiTM), Malaysia, successfully organized an international academic event entitled the International Colloquium on Policy and Governance at the UiTM Shah Alam Campus, Malaysia, on 4 June 2026.

The colloquium, held from 9:00 a.m. to 3:00 p.m. local time, served as a strategic platform for both institutions to disseminate innovative ideas and recent research findings in the fields of governance and public policy.

During the research presentation sessions, the UNHAS delegation presented several significant studies. The session commenced with a presentation by Andi Rahmat Hidayat, a doctoral candidate at Wageningen University, the Netherlands, who discussed the challenges and opportunities of local policies concerning decentralization and the governance of indigenous community lands.

MAP UNHAS students also contributed to the academic discussions through presentations of their research projects. Nailah Zayyan and Erick Fathur Rachman presented a study examining the effectiveness of the *Solata' Boss* application in enhancing investment services in Makassar City. This was followed by a presentation from Widi Alviana and Anantasya Putri, who analyzed community economic development through agricultural cooperatives in Mokupa Village.

The colloquium was further enriched by the participation of two distinguished scholars from FSP UiTM, Prof. Yarina Ahmad and Dr. Mahadir, who shared valuable insights into regional policy dynamics and governance issues.

Following the presentation sessions, participants engaged in an intensive discussion focusing on strengthening strategic cooperation between FISIP UNHAS and FSP UiTM. The discussion centered on the initiation of collaborative research projects among faculty members and the development of student exchange programs involving both undergraduate and postgraduate students. These initiatives represent concrete efforts to advance internationalization and enhance the quality of education at both universities.

The International Colloquium on Policy and Governance reflects the shared commitment of UNHAS and UiTM to fostering academic excellence, strengthening international partnerships, and generating impactful research that contributes to the advancement of governance and public policy in the region.

DEAN OF FACULTY OF DENTISTRY, HIROSHIMA UNIVERSITY DELIVERS GUEST LECTURE ON RADIATION THERAPY FOR ORAL CANCER AT UNHAS

Strengthening its international academic collaborations, the Faculty of Dentistry (FKG), Hasanuddin University (UNHAS), held an International Class Guest Lecture for the Clinical Medical Sciences Course. The session featured Prof. Naoya Kakimoto, DDS, Ph.D., Dean and Professor of the Department of Oral and Maxillofacial Radiology at Hiroshima University, Japan, as the distinguished guest lecturer.

The lecture, entitled "Radiation Therapy for Oral Cancer," was held on Friday, June 5, 2026 from 11:00 a.m. to 12:00 p.m. WITA at the Molar Room, Faculty of Dentistry, UNHAS. The session attracted enthusiastic participation from international class students, regular undergraduate students, and dental residents, reflecting a strong interest in gaining insights from a renowned international expert in oral and maxillofacial radiology.

The event was also attended by drg. Erni Marlina, Ph.D., Sp.PM., Subsp.Inf(K), Vice Dean for Partnerships, Research, Innovation, and Alumni of the FKG UNHAS. In her remarks, she highlighted the significance of international academic collaboration in enhancing students' educational experiences and expanding opportunities for global engagement. She also expressed her appreciation to Prof. Kakimoto and Hiroshima University for their continued support in strengthening academic and research cooperation between the two institutions.

The event was also attended by drg. Erni Marlina, Ph.D., Sp.PM., Subsp.Inf(K), Vice Dean for Partnerships, Research, Innovation, and Alumni of the FKG UNHAS. In her remarks, she highlighted the significance of international academic collaboration in enhancing students' educational experiences and expanding opportunities for global engagement. She also expressed her appreciation to Prof. Kakimoto and Hiroshima University for their continued support in strengthening academic and research cooperation between the two institutions.

During the lecture, Prof. Kakimoto delivered a comprehensive overview of radiation therapy as one of the primary treatment modalities for oral cancer. He discussed recent advances in radiotherapy, treatment planning strategies, clinical considerations, and the critical role of multidisciplinary collaboration in improving patient outcomes. The presentation was followed by an interactive discussion session, during which participants actively engaged with the speaker through questions and academic exchanges on contemporary approaches to oral cancer management.

The guest lecture aimed to broaden students' and residents' understanding of oral oncology while providing exposure to international perspectives in clinical dental and medical sciences. Furthermore, the activity served as a platform for strengthening the academic partnership between UNHAS and Hiroshima University, paving the way for future collaborations in education, research, and academic exchange.

TECH4GOOD 2026: UNHAS AND UNIVERSITI PUTRA MALAYSIA STRENGTHEN GLOBAL COLLABORATION THROUGH RESEARCH AND COMMUNITY ENGAGEMENT

The Faculty of Engineering (FT), Hasanuddin University (UNHAS), in collaboration with the Faculty of Computer Science and Information Technology (FSKTM), Universiti Putra Malaysia (UPM), successfully organized Tech4Good 2026 on 4 June 2026. The program combined academic and community engagement activities through the International Symposium on AI, Immersive Reality and Cybersecurity (AIRC 2026) at FT UNHAS and international community service programs at MAN (State Islamic Senior High School) 2 Makassar and MTsN (State Islamic Junior High School) 1 Makassar. Organized by the Global Engagement Office (GEO) FT UNHAS, the initiative aimed to strengthen international partnerships and promote collaboration in education, research, innovation, and community service.

Tech4Good 2026 focused on three key themes: Artificial Intelligence (AI), Immersive Reality, and Cybersecurity. The program brought together academics, researchers, industry practitioners, university students, and school students to explore emerging technologies and their societal impact. The event began with AIRC 2026 at the Center of Technology (COT) Building, FT UNHAS. In her opening remarks, Dr. Novy NRA Mokobombang highlighted the symposium's role in facilitating knowledge exchange while introducing postgraduate study and scholarship opportunities at UPM.

Representing FT UNHAS, Dean Prof. Dr. Eng. Ir. Muh. Isran Ramli emphasized the importance of international collaboration in addressing technological challenges and fostering innovation. FSKTM-UPM Dean Dato' Prof. Dr. Shamala K. expressed appreciation to UNHAS for hosting the event and supporting academic cooperation. The symposium featured keynote presentations by Dr. Nor Azura Husin (UPM) and Prof. Dr. Eng. Muhammad Niswar (UNHAS), who discussed current developments and challenges in AI, immersive technologies, and cybersecurity. Participants also attended a research program sharing session introducing UPM's postgraduate programs and opportunities for international research collaboration and scholarships.

AIRC 2026 continued with parallel research presentation sessions covering four tracks: Computer Engineering Applications, Artificial Intelligence and Data Science, Immersive Reality, and Cybersecurity. Researchers from UNHAS and UPM presented their latest studies and exchanged ideas to strengthen future collaboration. Following the symposium, Tech4Good 2026 expanded into community engagement activities at MAN 2 Makassar and MTsN 1 Makassar. The program introduced students to emerging digital technologies, including AI, Generative AI, Virtual Reality (VR), Augmented Reality (AR), Cybersecurity, Internet of Things (IoT), Hologram Technology, Digital Cinematography, and Human-Computer Interaction (HCI).

At both schools, students actively participated in interactive workshops and hands-on demonstrations led by lecturers and the UPM delegation. School leaders welcomed the initiative, highlighting its value in improving students' digital literacy and preparing them for future technological developments. Through Tech4Good 2026, UNHAS and UPM demonstrated their shared commitment to integrating education, research, and community service within a strong international collaboration framework. Beyond serving as a platform for academic exchange through AIRC 2026, the program also created direct social impact by enhancing digital literacy and introducing future technologies to the younger generation in Makassar.

FACULTY OF DENTISTRY UNHAS HOSTS INTERNATIONAL CLASS GUEST LECTURE WITH UNIVERSITI MALAYA

INTERNATIONAL CLASS GUEST LECTURE

"For Basic Medical Sciences Course"

Speaker:

**Prof. Cheng Hwee Ming,
Ph.D**

Departement of Physiology Faculty
of Medicine Universiti of Malaya,
Malaysia

"BRAIN AND BLOOD PRESSURE"

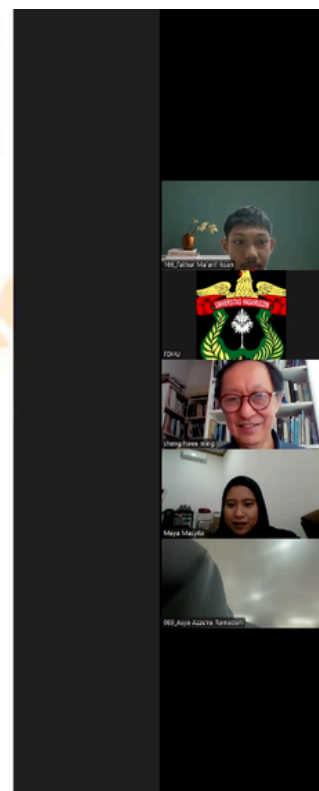

The Faculty of Dentistry (FKG), Hasanuddin University (UNHAS), successfully organized an International Class Guest Lecture for the Basic Medical Sciences Course. The event featured Prof. Cheng Hwee Ming, Ph.D., from the Department of Physiology, Faculty of Medicine, Universiti of Malaya (UM), Malaysia, as the guest speaker.

The lecture, entitled "Brain and Blood Pressure," was conducted online on Thursday, 4 June 2026, from 15:00 to 16:00 WITA via Zoom Meeting. The activity was attended by undergraduate students and faculty members as part of the internationalization program and academic enrichment initiatives of the Faculty of Dentistry.

Prof. Cheng Hwee Ming delivered a comprehensive presentation on the relationship between the brain and blood pressure regulation, highlighting current scientific developments and their relevance to medical and health sciences. The session provided participants with valuable insights into physiological mechanisms that influence cardiovascular health and disease.

The guest lecture was organized to strengthen academic collaboration between UNHAS and UM, while also exposing students to international perspectives in biomedical sciences. Through this activity, participants had the opportunity to engage directly with an internationally recognized expert and broaden their understanding of contemporary research in physiology. The event was coordinated by the International Affairs Office of the FKG UNHAS, reflecting the faculty's commitment to fostering global partnerships and enhancing the quality of education through international academic engagement.

UNHAS ACADEMIC HIGHLIGHTS INDIGENOUS LAND RIGHTS RESEARCH AT INTERNATIONAL POLICY AND GOVERNANCE COLLOQUIUM IN MALAYSIA

An academic delegate from Hasanuddin University (UNHAS) once again demonstrated the university's international presence through active participation in the International Colloquium on Policy and Governance. The forum, organized by the Faculty of Administrative Science and Policy Studies (FSPP), Universiti Teknologi MARA (UiTM) at its Shah Alam Campus, Malaysia, on Thursday, 4 June 2026, featured Andi Rahmat Hidayat, M.Si., Ph.D. (Cand.) as one of the keynote speakers. He is a lecturer in the Department of Administrative Science, FISIP UNHAS, and is currently pursuing his doctoral studies at the Department of Public Administration, Wageningen University & Research (WUR) in the Netherlands.

The academic forum was conducted in an interactive atmosphere and was enthusiastically attended by faculty members and students of FSPP UiTM, as well as a delegation of students from the Master of Public Administration (MAP) Program, FISIP UNHAS.

During his presentation, Andi Rahmat Hidayat delivered a research paper entitled “Democratization and Customary Land Struggle in Indonesia: Challenges and Prospects for Securing Customary Land Rights.” The study examined the complex dynamics surrounding the recognition of indigenous land rights in Indonesia in the post-Reformasi era. He explained that although Indonesia has undergone significant democratization and decentralization reforms since 1998, further strengthened by Constitutional Court Decision No. 35/2012, the actual recognition of customary land rights on the ground remains limited. According to data from the Indigenous Peoples Registration Agency (BRWA) in 2024, only approximately 13.8 percent—or 240 out of 1,425 traditional indigenous communities—have received formal recognition, while the allocation of customary forests represents only a small fraction of the country’s total potential customary forest area.

To explore the root causes of this issue, the study employed an analytical framework that identified key obstacles, including legal fragmentation, clientelistic informal institutions, and the persistence of predatory elites. These factors were analyzed alongside enabling conditions such as collective community action and reform-oriented leadership. Comparative case studies were conducted in three regions on Sulawesi Island: Enrekang Regency, Sinjai Regency, and Pasangkayu Regency. The findings revealed varying outcomes at the local level. The indigenous community in Enrekang successfully secured full recognition, while Sinjai achieved partial success. In contrast, Pasangkayu was unable to obtain recognition due to strong legal fragmentation, the influence of extractive industries, and the absence of reform-oriented leadership. The research concluded that indigenous communities capable of establishing close informal relationships with influential political actors—and those not confronted by alliances between state and business elites—have a significantly greater chance of navigating complex procedures and securing formal legal recognition.

The data-rich presentation concluded with a lively and engaging discussion session involving participants from both institutions. The academic atmosphere became even more dynamic as the discussion evolved into a comparative examination of customary land governance policies in Malaysia, including those implemented in Peninsular Malaysia as well as in Sabah and Sarawak. This international colloquium is expected not only to serve as a platform for disseminating cutting-edge research from both universities but also to strengthen future strategic collaborations, particularly in the development of joint research initiatives among faculty members and the implementation of student exchange programs.

UNHAS STUDENT PROMOTES INDONESIAN CULTURE AT INTERCULTURAL EXCHANGE IN SHIMANE, JAPAN

On June 8, 2026, I participated in an intercultural exchange event held at Kunibiki Messe (Shimane Convention and Exhibition Center) in Matsue, Japan. The event was organized by the Center for Foreign Language Education of Shimane University with the aim of promoting understanding of different cultures and encouraging interaction between international students and local elementary school children and their families.

During the event, I gave a poster presentation about my home university, the Japanese Literature at Hasanuddin University. In my presentation, I introduced Hasanuddin University, explained the subjects and fields of study offered in the Japanese Literature, and shared information about student life and academic activities in the department.

In addition to the poster presentation, I interacted with children through quizzes about Indonesia. These activities allowed me to introduce Indonesian culture, geography, and general knowledge in a fun and engaging way. The event also brought together international students from various countries and regions, each introducing aspects of their own cultures to the participants.

Through this experience, I was able to share information about Hasanuddin University while also strengthening cultural exchange and mutual understanding with members of the local community.

Meet Our Stuvo!

My Journey as an IO Student Volunteer:

Anis Abdullah Assyaukani
Faculty of Medicine

"It is as beautiful as the first day I know you" those are the words spoken by the little heart of one who dreams to be part of the International Office (IO) Hasanuddin University (UNHAS). Hello my name is Anis and this is my story as an IO student volunteer (Stuvo) at UNHAS.

Before joining IO as a volunteer, I participated in the Geographic Series program for two consecutive years. This experience exposed me to diverse perspectives on culture, local wisdom, society, and global issues, while strengthening my communication, teamwork, and adaptability skills. And from there I wonder if I can be one of those mesmerizing individuals who stands and shares their international experience. And so it began my journey to be part of IO Unhas.

I immediately followed more like stalking all the hustle and bustle from IO until it comes the day where they recruit some new student volunteer yeayyy~. In the state of unbearable excitement I applied to be part of and go through some process of selection and finally I didn't make it.

Well of course not everything is as easy as your daydreaming :v, but with the right time and with the right way those wishes will blooming in front of you. And so come day and night waiting for next recruitment of Stuvo and the day has come, feeling the same emotion as last year going through all the process, then in one most ordinary day I got an email, it was from the IO UNHAS, at first though I thought it would be the same email I got from last year, it the a sentence "you're~" "accepted~" UNBELIEVABLE!!!!!!!, after all this time the day of me standing on my own dream and hope has arrived, So it has started the journey of being a Stuvo at the IO UNHAS

My experience as a volunteer in the IO further enriched my journey by allowing me to interact with international students from diverse cultural and linguistic backgrounds. These interactions taught me the values of inclusivity, mutual respect, and meaningful cross-cultural communication. More importantly, these interactions helped me understand that diversity is not a barrier, but rather a driving force for learning and personal development.
